

# Applying for Child Support Services

You are not receiving child support services from the State of Nebraska because you have a private order. The Child Support Services Program is available to help you if you apply for our services.

## Benefits

- A caseworker is assigned to manage your case
- Encourage payment and compliance with your child support order
- Modify your court order, when applicable

## Available enforcement actions

- Income Withholding
- License Suspension
- Tax Refund Intercept Program
- Many other enforcement options

Enforcement actions are not triggered for a parent who is current on their support obligation.

Enforcement actions are used to encourage payments when needed.
