

Addiction and Criminal/Juvenile Justice Performance Assessment Rubrics

“Recognizing the connection between substance use and crime and addressing it effectively through treatment is imperative to ensure public safety and public health for Nebraska citizens.” (Substance Abuse Treatment Task Force Final Report, January 1, 2000)

Preface: The addictions and justice systems, as well as licensed providers, are covered by distinct and separate regulations and guidelines which are encouraged to be complementary and supportive of the elements recommended in this document. Licensed and non-licensed professionals will each be dealt with in separate sections of this document.

Performance Assessment Rubrics for Licensed Addiction Professionals Working in the Addictions Field

(PLADC, LADC, PLMHP, LMHP, LIMHP, LCSW, Psychologist Ph.D., MD)

Licensed Professionals who work in the Addictions Field

Licensed professionals typically have an array of strengths and skills that range from newly developing to exemplary as they enter the addictions service delivery field and gain experience in working with individuals with substance use disorders and who are involved in the justice system. In addition, the level of training across varied disciplines providing addictions service is diverse and difficult to quantify. It is acknowledged that a variety of skills and knowledge are needed and it has become important for professionals to adapt to integrating elements specific to the criminal justice population. It is important to note that the skills and knowledge reviewed here are intended for the development of addictions professionals to better work with the justice population.

Basic elements recommended to work with the criminal/juvenile justice population:

- **Knowledge of the Nebraska Justice System (Adult and Juvenile)**
 - Criminal and Juvenile Justice System Points
 - Necessity for collaboration and case management for criminal offenders
 - Evidenced-based interventions to address criminality
 - Understanding the state service delivery system and maintaining competency in accessing this system.
- **Knowledge of Criminogenic Factors in Addictions Treatment**
 - Knowledge of the impact of criminogenic factors on thinking
 - Knowledge of how criminal thinking impacts substance use disorder treatment and outcomes
 - Knowledge of the difference between criminal behavior and criminogenic need
 - Knowledge of risk for re-offending on the treatment, management and intervention planning processes
 - Knowledge of the Stages of Change for readiness to change
 - Knowledge of Motivational Interviewing and its use in treating criminal offenders
 - Knowledge of American Society of Addiction Medicine (ASAM) criteria, Level of Care placement criteria
 - Basic knowledge of the difference between criminal thinking behaviors and potential psychopathology.
- **Instrument Training Needs**
 - Standardized Model Components
 - Familiarity with instruments evidenced-based and strength-based in design that integrate family systems into the assessment process
 - Addiction Severity Index and/or Comprehensive Adolescent Severity Inventory
 - Standardized Reporting Format for Assessments
 - Risk Assessment domains
 - How risk for re-offending impacts assessment, treatment, management and intervention strategies
 - Simple Screening Instrument
 - Overview of Tools utilized by the Criminal Justice System
 - Corrections and Probation: LS/CMI (Adult)
 - OJS and Probation: YLS/CMI (Youth)

Rubrics – Skill / Knowledge Levels for Licensed Addictions Professionals Suggested LEVELS of Knowledge and Skills

Note: *These “levels” are intended to assist in training, evaluation, and supervision. They are not intended to be a gauge of competency or ethical practice.*

**Level I
Basic Knowledge; 1-3 years of Experience; Provisional Levels**

- * Identifies a variety of models and theories of addiction and other substance-related problems (e.g., trauma, mental health, domestic violence, etc.); has minimal understanding and application of their specific relationship to client treatment.
- * Is minimally aware of how criminogenic need impacts substance abuse treatment (Demonstrates basic awareness of)
- * Minimally understands the CJ system and the need for collaboration in case management (Demonstrates basic understanding of)
- * Aware of the substance use context for individual clients but does not integrate treatment strategies, and interactions with the client, with understanding of the context.
