Since 2008, annual data reports have been developed for local teams. These reports have included demographic data, case progression data, and permanency data. Due to the limitations of JUSTICE, which is the court data system, case progression data was manually collected for these reports. This manner of collection ended with last year’s data reports. From 2013 on, case progression data is being collected through automatic data dumps. However, standardized coding is still not being utilized in all cases. For example, a hearing may still be coded as “Hearing” instead of “Adjudication Hearing.” Therefore, we may not be able to report on certain types of hearings in your jurisdiction because we do not have the data for it. We continue working with JUSTICE staff and county clerks to maximize proper data entry, and expect data entry to improve with subsequent data reports.

One additional change to this year’s data is that we are now “forward-looking” instead of “backward-looking.” In past reports, we analyzed data using cases that have already closed. In this report, we are using cases that opened within a certain time period, regardless of permanency, they have closed (except for case closure data). This will allow you to have a more up-to-date view of your team’s case progression.

Changes to the Data Collection Process and Data Reporting

Summary of What’s New

Since 2008, annual data reports have been developed for local teams. These reports have included demographic data, case progression data, and permanency data. Due to the limitations of JUSTICE, which is the court data system, case progression data was manually collected for these reports. This manner of collection ended with last year’s data reports. From 2013 on, case progression data is being collected through automatic data dumps. However, standardized coding is still not being utilized in all cases. For example, a hearing may still be coded as “Hearing” instead of “Adjudication Hearing.” Therefore, we may not be able to report on certain types of hearings in your jurisdiction because we do not have the data for it. We continue working with JUSTICE staff and county clerks to maximize proper data entry, and expect data entry to improve with subsequent data reports.

One additional change to this year’s data is that we are now “forward-looking” instead of “backward-looking.” In past reports, we analyzed data using cases that have already closed. In this report, we are using cases that opened within a certain time period, regardless of permanency, they have closed (except for case closure data). This will allow you to have a more up-to-date view of your team’s case progression.

COMING SOON IN 2014: AN ONLINE DATA DASHBOARD WITH REGULARLY UPDATED CASE PROGRESSION DATA

If you have questions about your data or the data reporting, please contact Kelli Hauptman at khauptman2@unl.edu.
Recent research establishes that chronic neglect is more likely to cause permanent negative outcomes in the child than a single instance of reported abuse.

Non-court involved cases are managed by DHHS in a voluntary or non-court capacity.

The proportion of non-court involved cases increased by 6% from 2011 to 2012.

The data for the type of reported maltreatment and type of out-of-home care was obtained from the Fostering Court Improvement website. Starting this year, the FCI website is reporting data based on team, in addition to data based on county and district. Data for the court and non-court placements and in-home and out-of-home placements for court cases was obtained from Voices for Children. This data is reported for the entire state.

Termination of Parental Rights
2012 Number of TPRs: 490 in state 37 in service area
Median Months from Removal to TPR (among adoptions)

Adoptions
2012 Number of adoptions: 493 in state 37 in service area
Median Months from TPR to Adoption

Reunifications
2012 Number of reunifications: 1812 in state 178 in service area
Median Months from Removal to Reunification

Termination of Parental Rights
2012 Number of TPRs: 490 in state 37 in service area
Median Months from Removal to TPR (among adoptions)

Adoptions
2012 Number of adoptions: 493 in state 37 in service area
Median Months from TPR to Adoption

Reunifications
2012 Number of reunifications: 1812 in state 178 in service area
Median Months from Removal to Reunification

*Excludes time 30 days after children return home on trial home visit

Non-court involved cases are managed by DHHS in a voluntary or non-court capacity.

The proportion of non-court involved cases increased by 6% from 2011 to 2012.

The data for the type of reported maltreatment and type of out-of-home care was obtained from the Fostering Court Improvement website. Starting this year, the FCI website is reporting data based on team, in addition to data based on county and district. Data for the court and non-court placements and in-home and out-of-home placements for court cases was obtained from Voices for Children. This data is reported for the entire state.
The permanency hearing must happen within 12 months of the child entering foster care.

For your team, 66% of cases, 109 cases, were not closed or had no jurisdiction terminated date entered as of June 30th, 2013.

### Data Tips on Abuse/Neglect Data Entry

**ORDER FORMS** | If data entry staff are confused on the type of hearing, consider amending court order forms to have checkbox headings with commonly occurring hearing titles listed (for example, the Protective Custody Hearing, First Appearance, and Adjudication).

**FIRST HEARING** | In every 3a case, the first hearing is a Protective Custody Hearing and should be coded as such, regardless of whether the children reside in-home or out-of-home. It is typically also a First Appearance Hearing if the rights advisory is given. Both types of hearings and orders need to be entered into JUSTICE.

**PERMANENCY HEARING** | Review hearings and permanency hearings often occur during the same time slot and one order is issued. Permanency hearings are required within 12 months of removal and every 12 months thereafter. If these hearings and orders occur during the same time slot, they must both be entered into JUSTICE.

**CASE CLOSURE** | When a judge closes a case or the case is dismissed, jurisdiction must be terminated. This is a 2-step process that terminates the case of the child and terminates jurisdiction. When multiple juveniles are on a case, jurisdiction must be terminated on each juvenile before the case is terminated.

The rate of re-entry shows the percentage of children removed from the home who had previously been in foster care. This does not include children entering or previously involved in in-home cases or voluntary services.

### Rate of Removal to Foster Care

For your team, 31% of removed cases open for more than a year were missing this order date.
REPORTING OF DATA | When sufficient case progression data is available for a particular interval, we report three pieces of information: 1) the number of cases that had recorded dates for both the beginning and the end of the interval, 2) the percentage of cases in which the required data was missing, and 3) a vertical bar chart representing the percentage of cases that progressed from the starting point to the ending point of the interval within a given length of time. When there are fewer than five documented cases, we omit the bar chart due to insufficient data.

The ex parte order, which is issued prior to the protective custody hearing, is required to be issued within 48 hours of removal. The protective custody hearing is the first hearing in any 3a case in which the child is removed.

The first appearance hearing occurs when the rights advisement is given. These two hearings (protective custody and first appearance) frequently occur at the same time. However, codes are not being entered for both hearing orders in many counties.

For your team, 16% of cases were missing this order date.
**REPORTING OF DATA**

When there are fewer than five documented cases, we omit the bar chart due to insufficient data.

The ex parte order, which is issued prior to the protective custody hearing, is required to be issued within 48 hours of removal. The protective custody hearing is the first hearing in any 3a case in which the child is removed.

The first appearance hearing occurs when the rights advisement is given. These two hearings (protective custody and first appearance) frequently occur at the same time. However, codes are not being entered for both hearing orders in many counties.

**Petition Filing to Protective Custody Hearing Order**

Number of cases with protective custody hearing order: 4

For your team, 98% of cases were missing this order date.

**Petition Filing to First Appearance Order**

Number of cases with first appearance order: 138

For your team, 16% of cases were missing this order date.

**Adjudication Order to Disposition Order**

Number of cases with adjudication hearing order and disposition hearing order: 80

For your team, 43% of cases were missing at least one of these order dates.

**Disposition Order to Review Order**

Number of cases with disposition hearing order and review hearing order: 90

For your team, 36% of cases were missing at least one of these order dates.

**Adjudication Order to Disposition Order**

Number of cases with adjudication hearing order: 102

For your team, 28% of cases were missing this order date.
The permanency hearing must happen within 12 months of the child entering foster care.

**Removal to Permanency Hearing Order**
Number of removed cases with permanency hearing order: 44

**Time to Court Case Closure**

For your team, 31% of removed cases open for more than a year were missing this order date.

**Rate of Removal to Foster Care**

**Victims Removed to Foster Care**

The rate of re-entry shows the percentage of children removed from the home who had previously been in foster care. This does not include children entering or previously involved in in-home cases or voluntary services.
Recent research establishes that chronic neglect is more likely to cause permanent negative outcomes in the child than a single instance of reported abuse.

Non-court involved cases are managed by DHHS in a voluntary or non-court capacity.

Data for the type of reported maltreatment and type of out-of-home care was obtained from the Fostering Court Improvement website. Starting this year, the FCI website is reporting data based on team, in addition to data based on county and district. Data for the court and non-court placements and in-home and out-of-home placements for court cases was obtained from Voices for Children. This data is reported for the entire state.

The proportion of non-court involved cases increased by 6% from 2011 to 2012.

The data for TPR and adoptions were obtained from the FCI website. Each year’s data includes cases from April of the stated year through March of the following year. The data in the graphs for reunification were obtained from HHS.

**Type of Reported Maltreatment (2012)**

**Court vs. Non-Court Cases**

**Initial Placement for Court Cases:**

**In-Home vs. Out-of-Home**

**Type of Out-of-Home Care (2012)**

**Termination of Parental Rights**

2012 Number of TPRs: 490 in state 37 in service area

Median Months from Removal to TPR (among adoptions)

**Adoptions**

2012 Number of adoptions: 493 in state 37 in service area

Median Months from TPR to Adoption

**Reunifications**

2012 Number of reunifications: 1812 in state 178 in service area

Median Months from Removal to Reunification

*Excludes time 30 days after children return home on trial home visit
In previous years, we obtained data on the type of discharge from HHS. Starting with this year, we are using the type of discharge as reported by Fostering Court Improvement.

This data shows how quickly children are finding permanency through the children’s, and not the court’s, eyes. The percent placed in a permanent home shows the percent children who were free for adoption or living with family within 15 months of removal. The percent of children adopted within 12 months includes children in care with both TPRs between April 2011 and March 2012.

Changes to the Data Collection Process and Data Reporting: Summary of What’s New
Since 2008, annual data reports have been developed for local teams. These reports have included demographic data, case progression data, and permanency data. Due to the limitations of JUSTICE, which is the court data system, case progression data was manually collected for these reports. This manner of collection ended with last year’s data reports. From 2013 on, case progression data is being collected through automatic data dumps. However, standardized coding is still not being utilized in all cases. For example, a hearing may still be coded as “Hearing” instead of “Adjudication Hearing.” Therefore, we may not be able to report on certain types of hearings in your jurisdiction because we do not have the data for it. We continue working with JUSTICE staff and county clerks to maximize proper data entry, and expect data entry to improve with subsequent data reports.

One additional change to this year’s data is that we are now “forward-looking” instead of “backward-looking.” In past reports, we analyzed data using cases that have already closed. In this report, we are using cases that opened within a certain time period, regardless of permanency they have closed (except for case closure data). This will allow you to have a more up-to-date view of your team’s case progression.
