Weighted Caseload Report

Nebraska District Courts Weighted Caseload Report

Nebraska has a district court in each of its 93 counties, organized into 12 Judicial Districts. Pursuant to Neb. Rev. Stat. § 24-301.02, the Legislature determines the number of district court judges who serve in each judicial district, and the geographic boundaries of each judicial district. An objective assessment of judicial workload allows informed decisions about district boundaries and the number of judges needed to timely resolve the cases in each judicial district.

To assist in evaluating judicial workloads, Neb. Rev. Stat. § 24-1007(1) requires the Nebraska Administrative Office of the Courts and Probation (AOC) to compile judicial workload statistics based on caseload numbers weighted by category of case. These weighted caseload statistics are used by the Judicial Branch, the Judicial Resources Commission, and the Legislature to evaluate judicial need, and guide decisions and recommendations on how best to allocate judicial resources across the state.

To ensure the validity, uniformity and accuracy of the AOC's judicial workload statistics, a statewide judicial time study was conducted in 2019-2020 under the direction and leadership of the National Center for State Courts. For a full description of the judicial time study and the recommended weighting methodology and standards, see *Nebraska Judicial Workload Assessment Final Report* (October 2020) on the Nebraska Supreme Court Website. Because this Weighted Caseload Report utilizes the methodology and standards from the 2020 workload assessment, direct comparison to archived reports is not recommended.

No quantitative judicial workload assessment method, including the weighted caseload method, can determine the exact number of judges needed within each court. For example, judges may be asked to assist non-home districts to ensure speedy trials for all involved and that one district is not unduly overburdened. **To address this challenge, the Research and Data Team have added an asterisk next to the name of the judges that provided judicial assistance in the last fiscal year (FY 2024) to other districts.**

Weighted caseload statistics approximate the number of judges needed to handle the current caseload based upon the calculations of a three-year rolling average of case filing data. Therefore, when weighted caseload statistics are examined in conjunction with other compelling and critical metrics, they provide a vital part of an objective and standardized assessment of judicial needs and the fair allocation of judicial resources across juvenile courts in the State of Nebraska.
