Statewide Recidivism Rate

of adults who were successfully
discharged from Probation, were found
responsible for another qualifying
offense within three years of their
release. This current recidivism rate is
reported as of Mar 31, 2025. At this
time, PRS cannot be separated within
the recidivism data and are included in
this percentage.

Recidivism by Risk Level

As predicted by the validated risk assessment
tool, Level of Service/ Case Management
Inventory (LS/CMI), the total population of low
risk adults who discharge successfully between
April 1, 2021 and April 1, 2022 (Supreme Court
requires 3 years from date of release)
recidivated at a lower rate than the total
population of medium or high risk adults.
