## Statewide Recidivism Rate

of adults who were successfully  
discharged from Probation, were found  
responsible for another qualifying  
offense within three years of their  
release. This current recidivism rate is  
reported as of June 30, 2025. At this  
time, PRS cannot be separated within  
the recidivism data and are included in  
this percentage.

## Recidivism by Risk Level

As predicted by the validated risk assessment  
tool, Level of Service/ Case Management  
Inventory (LS/CMI), the total population of low  
risk adults who discharge successfully between  
July 1, 2021 and July 1, 2022 (Supreme Court  
requires 3 years from date of release)  
recidivated at a lower rate than the total  
population of medium or high risk adults.
